“In the activity "New Masculinities" I understood and found it interesting to know about the types of masculinities. I think it is important to change our way of thinking to help us have equal treatment, that it is not good to continue to be guided by the past, it is also important to educate and teach new ways of relating and treating other people, equally men and women, so that we can transform and improve the assignment of roles.

Elvia Gutiérrez
Mother

“Whenever I have received workshops from the Oaxaca Learning Center I find them very good and useful. The workshops help me to understand my children and to guide them. Thanks to the Center we learn a lot and I feel accompanied. I am very happy with the work they do with my children.”

Keith Born
Volunteer

“The intercambio program provides not only cultural and linguistic exchanges, but also the opportunity to play a sort of mentor role for a young and ambitious person. In every session we have fun, learn some language, and gain insights into ourselves and our place in the world. It's a very rewarding and fulfilling experience!”

“I am very happy with the collaboration with the Oaxaca Learning Center. I got to know the Oaxaca Learning Center as a very professional, ambitious and connecting organization that breathes education, personal development and leadership! Together we want to support more young people on their personal path to study and work!”

Laurie Thompson
CANFRO Coordinator

“CANFRO is very proud to support the hard work and clear mission of the Centro de Aprendizaje. Our loyal donors recognize the winning strategy: providing financial support for the dedicated tutors so they are able to pay for their own university education while, in turn, working to strengthen the academic capacity of the high school students they are tutoring. The tutors also provide positive role modeling and mentoring to younger students. Everyone benefits!”
